

SENIOR CYBERSECURITY SPECIALIST

BEACHWOOD, OH

Summary

Performs all necessary duties to ensure the safety of information technology assets and to protect systems from intentional or inadvertent access. This position will frequently collaborate with Cybersecurity Management and provide guidance and direction for the Cybersecurity program. Provides best solutions to identified needs, meeting specific operational and business objectives, technology capabilities, and human resource requirements. Frequently collaborates with Cybersecurity leadership on projects and direction for the Cybersecurity program. Additionally, provides specialized technical expertise and support to clients, IT management, and staff in risk assessments, implementation and operational aspects of Cybersecurity procedures and products. Maintains and fosters the ongoing service relationships throughout the organization.

Responsibilities:

- Maintains baselines for the secure configuration and operations.
- Tracks all activity, ensuring timely resolution of problems.
- Leading the identification of advanced security systems and controls to ensure the monitoring and configuring of security appliances.
- Leads Cybersecurity projects, including planning, obtaining customer input and projecting resource requirements.
- Collaborates on IT projects to ensure that security issues are addressed throughout the project life cycle.
- Analyzes and integrates Security Solutions into multiple platforms, including Clinical and Financial Systems.
- Researches and assesses new threats and security alerts and recommends remedial action.
- Reviews security system requirements with customers and translates requirements into specific functions or deliverables.
- Analyzes flow chart processes and recommends ways to reduce steps and increase efficiency through use of technology.
- May coach or provide guidance to lower-level security professionals and supports the continuous process of optimizing department resources.
- Effectively communicates security procedures and policies with caregivers.
- Weighs business needs against security concerns and articulate issues to management.
- Provides after-hours support.

Requirements

Education / Experience:

- Bachelor's degree in Information Technology/Computer Science or related field *preferred*.
- A High School diploma/GED *required*.

CERTIFICATIONS:

- Certifications from SysAdmin, Audit, Network and Security Institute (SANS), International Information Systems Security Certification Consortium (ISC2) or Computing Technology Industry Association (CompTIA) preferred or other position related certifications.
- For Information Technology Division caregivers, ITIL Foundations certification is required within 6 months of position start date.
