

Clinical Data Coordinator, ICD-10-CM Coding

New York, New York

Summary

The Clinical Data Coordinator will coordinate activities focused on ensuring the accuracy and integrity of clinical data, as well as its compliance with regulatory standards and hospital revenue initiatives. Provide expertise in the areas of coding and classification systems to healthcare providers throughout our hospital, with a focus on Inpatient and Ambulatory Surgery, and help drive improvements in documentation, reimbursement and the revenue cycle. Direct and evaluate the performance of assigned staff. Perform chart, internal/external coding, DRG and APG reviews to ensure compliance with established coding principles and documentation guidelines.

Preferred Criteria

- 5 years of Health Information Management/Medical Records experience in an academic medical center environment
- Prior experience as a DRG/APG Coordinator
- Experience with 3M, Optum, Cerner and Epic
- Health Information and/or Coding certification

Required Criteria

- 3 years of coding experience
- CCS certification
- Bachelor's Degree or equivalent years of experience
- Strong interpersonal and coder education expertise skills are essential to succeed
