

Clinical Documentation Improvement (CDI) RN

Marshall Medical Center
Job Location: Remote (Local)
Part Time, Days

JOB SUMMARY:

The Clinical Documentation Integrity RN facilitates improvement in the quality and completeness of patient records on a concurrent and retrospective basis, using a multi-disciplinary process. Uses clinical knowledge and coding guidelines to ensure documentation and coding represents the true acuity of our inpatients. This position intervenes in areas needing physician clarification and collaborates with physicians and non-physician staff in coding, case management, performance improvement and utilization review. Analyzes results and identifies patterns, trends and variations in coding and documentation practices. Feedback and training will be provided on both a team and individual level.

QUALIFICATIONS:

Education/Licensure/Certification:

- Current CA Registered Nursing (RN) license required.
- Strong clinical background including 3-5 year's acute care experience and preferable Case Management, Utilization Review (UI) or Performance Improvement experience.

KNOWLEDGE:

- Current knowledge of and expertise in Medicare, Medi-Cal and third party payer coding and documentation requirements preferred.
- Familiarity of International Classification Diseases (ICD-9) coding and Diagnosis Related Groups (DRG) assignment preferred.
- Working knowledge of MS Office (i.e. Excel, Word, PowerPoint and Outlook) preferred.

SKILLS:

- Ability to research, interpret and apply clinical practice guidelines.
- Ability to present a variety of information to a diverse audience.
- Must have analytical thinking skills.
- Must be team-oriented, highly organized and a productive individual with proven record of confidentiality, achievement, diplomacy, flexibility and prioritization skills.
- Must be able to effectively communicate with physicians and work independently while maintaining a high level of professionalism.
