

Analyst - Medicaid/Medicare

Commonwealth Care Alliance

Job Location: Providence, RI/Hybrid

Full Time/Days

JOB SUMMARY:

The Analyst supports the Director of Market Strategy and Planning by undertaking a variety of tasks as well as overseeing new Medicare/Medicaid initiative related implementations and managing performance reporting for the Rhode Island team. You will help in planning and organizing program initiatives and carrying out daily operational duties.

This role will participate in the development and implementation of processes and program initiatives, to ensure an exceptional member experience. Partnered with network, clinical, member services, and other functional areas; this role will be creative in design and implement solutions that will support the optimal workflow for Medicaid and Medicare members. This includes highlighting key opportunities and recommendations for improvement. Core functions include providing data analysis and monitoring (including trend display & forecasting) related to regulatory compliance, quality, process, and performance. Working closely with the Process/Performance, Quality, and Compliance teams to develop and optimize these functions while supporting the execution of key corporate initiatives

The ideal candidate will have the ability to work across internal and external stakeholders to coordinate large scale implementations and daily troubleshooting of operational concerns.

MINIMUM REQUIREMENTS:

- Medicare/Medicaid managed care experience
- Strong subject matter expertise in DSNP best practices and product/program design
- Experience working effectively with state government agencies
- Proven experience in program coordination and project management or relevant position

EDUCATION/LICENSES/CERTIFICATIONS:

- Bachelor's Degree or equivalent experience
