

# Healthcare Consulting Senior Analyst

**LBMC**

Job Location: Remote

Full Time/Days

## **JOB SUMMARY:**

- Provide advisory support to healthcare clients seeking guidance on operational improvement, revenue optimization, industry benchmarking, and more.
- Assist with the implementation and design of data environments to enhance the impact of user dashboards.
- Support coding and compliance reviews through robust analytics, ensuring regulatory adherence and revenue optimization.
- Apply healthcare experience and data analytics to conduct comprehensive buy and sell-side healthcare due diligence, providing valuable insights for informed decision-making.
- Engage in provider compensation modeling reviews, redesigns, and implementation engagements, ensuring alignment with industry standards and best practices.
- Perform and manage client deliverable development, ensuring high-quality outputs, adherence to project timelines, and facilitating productive work sessions with internal and external stakeholders.
- Mentor and support peer and junior staff, contributing to their professional development through collaborative learning initiatives.

## **MINIMUM REQUIREMENTS:**

- At least 3-5 years of experience in healthcare and data analytics, preferably in a consulting or advisory capacity.
- Proficiency in building robust Excel models and Microsoft Power BI dashboards.
- Familiarity with cloud-based platforms and processes, including but not limited to, data ingestion, modeling, and data analytic/visualization components.
- Knowledge of physician compensation methodologies, healthcare due diligence processes, and medical coding principles.
- Excellent communication and interpersonal skills, capable of effectively engaging with diverse stakeholders presenting findings to executive audiences.

## **EDUCATION/LICENSES/CERTIFICATIONS:**

- Bachelor's degree in a relevant field (e.g., Healthcare Administration, Business Analytics, Accounting, Finance).
