Manager - Quality Management

Belmont Behavioral Health System
Job Location: Philadelphia, PA
Full Time/Days

JOB SUMMARY:

Belmont Behavioral Health System is seeking a dedicated and experienced Quality Manager responsible for regulatory compliance and managing performance improvement activities for the health system. The ideal candidate will have a strong background in quality assurance and project management with a foundational understanding of The Joint Commission accreditation and regulatory audits. This role will report to the Director of Quality and Regulatory Affairs.

MINIMUM REQUIREMENTS:

- Two or more years' experience in Quality Management required.
- One or more years' supervisory experience required.
- Experience in a behavioral health setting preferred.
- Experience with TJC accreditation and regulatory audits preferred.

EDUCATION/LICENSES/CERTIFICATIONS:

- Bachelor's degree in nursing or human services field required.
- Master's degree in nursing or human services preferred.
- Certifications related to health care risk management, safety, and or process improvement preferred.
- CPR and de-escalation/restraint certification required (training available upon hire and offered by facility).
