Earn Continuing Education Units (CEUs)

4 CEUs: This program has been approved for 4 continuing education units by the American Institute of Healthcare Compliance for our certified professionals. These continuing education units may be applied towards Core CEUs for all AIHC® credentials.

Overview of this Course

The 8D problem-solving process is best known as the 8 Disciplines and used to solve major, critical, chronic, and recurring problems. This short course introduces the 8D approach, which provides a better understanding of Root Cause Analysis (RCA) and how to use basic tools required for problem-solving in a healthcare setting. Need more training in RCA? Consider registering for the [Auditing for Compliance](#) w/option to become a *Certified Healthcare Auditor*.

The Joint Commission requires that healthcare institutions have a comprehensive process for the systematic analysis of sentinel events. The 8D RCA process is one of the most commonly utilized tools for this purpose and addresses the Joint Commission requirements.

Leadership must gradually change the culture so that the need to report and do something about a safety issue outweighs the fear of being punished. Senior leaders, C-Suite executives, unit leaders, physicians, nurses, and all other staff must be held to the same standards. This course focuses on Joint Commission standards and skills to build a culture of safety for your organization.

5 Easy Lessons - What You Will Learn

Importance of Patient Safety

- Safety Challenges in Health Care
- The Preventable Adverse Effect
- Terms and Definitions Related to Errors, Adverse Events, Negligence, etc.

Medical Error Reduction and Prevention

- General Root Causes of Medical Errors
