

# Quality Risk Management Analyst

Advocate Health

Job Location: Oshkosh, WI/Hybrid  
Full Time/Days

## **JOB SUMMARY:**

Assesses need for quality improvement, and develops and implements planning for the organization. Provides support and service by assisting in the prevention, reduction, and control of loss to patients, families, volunteers, physicians and employees. Promotes collaborative relationships among risk management throughout Aurora.

## **MINIMUM REQUIREMENTS:**

- Typically requires 5 years of experience in healthcare quality and/or risk management, which includes experience in risk management principles, and continuous quality improvement tools and concepts.
- Knowledge of federal, state and other external health care regulations and standards and ability to research those regulations.
- Knowledge of evidence based, best practice resources to promote efficiency and effective outcomes.
- Working knowledge of process improvement methods and statistical tools.
- Effective conflict management and resolution skills.
- Basic working knowledge of medical terminology, clinical concepts and disease management.
- Intermediate computer skills including experience in using Microsoft Office (Excel, Word, Power Point, Access) or similar products.
- Strong written and oral communication skills including good presentation skills.
- Detail oriented with excellent organizational skills.
- Must be a team player with ability to interact with all levels of staff often in sensitive situations.
- Demonstrated analytical and problem-solving skills to track outcomes.
- Must have the ability to influence change without direct authority and strong negotiation skills.

## **EDUCATION/LICENSES/CERTIFICATIONS:**

- Bachelor's Degree in Risk Management or related field.

## **ADDITIONAL INFORMATION:**

- This role is a hybrid role requiring on-site work at Oshkosh and Fond Du Lac, while offering remote work opportunity.
