South Shore
Health

UI Developer
Job Location: Remote
(Must reside in MA, RI, CT, or NH)

At South Shore Health, we come together to improve the health of our family, friends, and neighbors by delivering exceptional care in every setting. We are seeking a skilled **UI Developer** to join our Information Systems team. In this role, you will support the development and maintenance of enterprise interfaces across key systems including Epic and Workday. This position plays a critical role in ensuring seamless integration of clinical and operational systems across the organization while maintaining optimal performance, reliability, and data integrity.

Responsibilities:
● Perform interface analysis, build, performance monitoring, and reporting to ensure standardization, consistency, and efficiency across the South Shore Health enterprise
● Develop, build, and maintain interfaces between applications and databases, including Epic and Workday systems
● Facilitate collaboration with user departments and vendors to define interface requirements, specifications, and project scope
● Prepare and recommend technical documentation required to successfully implement and support assigned projects
● Work with end users and IT staff to develop procedures for monitoring interfaces and maintaining optimal system performance
● Develop and monitor testing methodologies and implementation plans to validate interface functionality and reliability
● Maintain and update interface specification documentation and assist with technical documentation, conversion plans, and operational training materials
● Provide troubleshooting and support for integration issues in a 24/7 healthcare environment

Qualifications:
● Bachelor's degree in Computer Science or related field, or an equivalent combination of education and information systems experience
● Minimum of 2 years of professional interface development experience in a healthcare environment
● Proficiency with Rhapsody or another integration engine, with experience developing and maintaining enterprise system interfaces
● Experience with Epic Bridges and Workday interfaces preferred, including integrations across clinical and operational systems
● Experience with Cleo or other SFTP solutions, APIs, and familiarity with healthcare data exchange and integration standards preferred
● Knowledge of HIPAA, JCAHO, and other healthcare regulations, with strong analytical, organizational, communication skills and the ability to participate in 24/7 on-call support as needed

More About South Shore Health:
South Shore Hospital is Southeastern Massachusetts's leading provider of emergency, acute and outpatient care. We are consistently recognized for quality of care, including being recognized as a Top General Hospital by the Leapfrog Group. Our hospital has also received Magnet Recognition Program designation, a distinction only 8% of U.S. hospitals achieve. Join us in providing world-class care to the communities of the South Shore.

Living On the South Shore:
Located south of Boston, but within easy driving or boating distance of greater New England, the South Shore is a wonderful place to live. No matter your interest: history, the beach, music, art, shopping, fine cuisine, foliage, sports – we have it all. And with some of the best schools in the country, from kindergarten to college, this is a great place to raise a family.
